

Creating Our Flask Application and Loading Our Model By Using Load Model Method

Date	19 November 2022
Team Id	PNT2022TMID04240
Project Name	AI-POWERED NUTRITION ANALYZER FOR FITNESS ENTHUSIASTS

Creating our flask application and loading our model by using the load_model method

```
app = Flask(__name__, template_folder="templates") # initializing a flask app
# Loading the model
model = load_model('nutrition.h5')
print("Loaded model from disk")
```
